FOR RELEASE  
JULY 14, 2011

## **TCI Becomes a Symitar™ VIP Member**

TCI, a leader in loan origination solutions for credit unions, banks, and finance companies continues to enhance customer support by enrolling in Symitar's Vendor Integration Program (VIP). Symitar, a division of Jack Henry & Associates, Inc. (Nasdaq: JKHY), provides core processing solutions and enterprise-wide automation for approximately 700 credit unions.

VIP membership simplifies the process for lender credit unions that want to integrate Symitar's Episys® core system with DecisionLender. As a Symitar VIP member, TCI has access to Symitar's technical resources—implementation, programming, quality assurance and testing as well as support—so that customers don't have to worry about compatibility or technical issues.

"Our customers are seeking more and more complex solutions to stay competitive," said TCI President Bill Nass. "As a Symitar VIP member, we are ensuring that the integration of their core system with the DecisionLender interface is simplified. Through this relationship our customers aren't burdened with the technical aspects of software integration."

About TCI: Supporting more than 250 credit unions, banks and finance companies across the United States, TCI provides affordable loan origination solutions that give direct, indirect, internet and retail lenders the edge they need to be first.
