## **TCI INTRODUCES ADDRESS SCREENER**

*Unique Web-Based Solution Locates Correct Business and Consumer Addresses to Help Companies Quickly Re-Direct Time-Sensitive Returned Mail*

**January 26, 2003, Hauppauge, New York**—As nearly every executive can testify, returned mail is a serious problem for the business community. For companies operating in the banking and finance industries, insurance sector, and just about any other category, returned mail often results in a myriad of problems that can affect a company’s cash flow, income, efficiency, reputation—and in some instances—legal standing, particularly if a business must demonstrate that it effectively communicates with customers to meet federal and state regulations.

To help these companies regain control over their misdirected and returned mail, Teledata Communications Inc. (TCI) has developed Address Screener®, a unique Web-based application that enables companies to obtain last-known addresses for businesses and consumers, enabling them to promptly re-send their time-sensitive mail to customers, vendors, partners and other parties.

“For years, businesses have been plagued with an epidemic of returned mail that can adversely effect business operations,” explained William S. Nass, president of TCI. “Address Screener is a Web-based, cost-effective solution to help these organizations quickly capture last-known addresses of businesses and consumers, enabling them to expeditiously re-send important mail to the right location. Not only does Address Screener improve communication, it helps customers reduce waste and enhance efficiency.”

Address Screener accesses some 400 public and private database sources to identify and capture last known addresses. Additionally, the application formats and prints the addresses directly onto mailing labels for customers. The data can also be uploaded into the customer’s in-house data library, if requested.

### **More...**

As a web-based application, Address Screener is also a cost-effective solution. There are no set-up charges—customers just pay a set fee per successful address retrieval.

Address Screener is available for Web Ex demonstrations. For more information, please visit [www.tcticredit.com](http://www.tcticredit.com) or call (800) 824-9069 ext. 135.

**About Teledata Communications, Inc.**
